

FERTIGRENA N12 SPRINT

ORGANO-MINERAL FERTILIZER PHYTOSTIMULANT OBTAINED BY REACTION

FERTIGRENA N12 is ideal
for flowers and conventional
orchards

**FREE FROM
CHROMIUM VI**

SOURCE

Organic: feathermeal
Mineral: ammonium
sulphate and urea

Physical state: micro 2 mm - pellet 4 mm

Packaging available:

25 kg bags - 500 kg bags

FERTIGRENA N12 SPRINT CALCIO is an organo-mineral fertilizer, ideal for basic fertilization for a variety of soils in conventional agriculture.

The high content of Nitrogen is gradually released, creating a synergetic curve for spring growth that starts with the immediacy of ammoniacal nitrogen and is then followed by the boost provided by the ureic nitrogen.

In the background, the slow-release organic nitrogen continues and completes the mineralization process, contributing to a steady growth and an overall good plant health. The high percentage of organic substance binds the N through the naturally present humic and fulvic acids, channeling nutrition to the roots.

Perfect for use in conventional farming, such as with flowers and nurseries, turf rolls and ornamental lawns, but also in non-organic orchards and fields.
